Education

Jaypee University of Engineering and Technology

Bachelors of Technology in Computer Science & Engineering - CGPA - 8.1

Sep. 2021 – May 2025 Guna, Madhya Pradesh

Experience

Software Engineer Intern — Linktoany

November 2023 - Present

Internship

- Spearheaded the development and implementation of integration pipeline automation, resulting in a remarkable 55% reduction in integration pipeline creation time..
- Enhancing the integration between HubSpot and EZ Texting standalone services, ensuring seamless communication and data flow between both platforms.
- Engineered the GoDaddy Connector Refresh Worker, a critical component responsible for monitoring and refreshing access tokens, ensuring uninterrupted functionality and security of applications.
- Enhanced the connector's capabilities by implementing functionality to generate code for the food vertical, thereby broadening its utility to cover both retail POS and food sectors. This contribution facilitated the achievement of a significant project milestone, attaining 75% completion in project deliverables.

Owasp Maryam June 2023

Open-Source

- Contributed to the OWASP Maryam open-source project by actively developing a web interface for the iris module using React, demonstrating proficiency in modern web development technologies.
- Collaborated with the project team by submitting a **pull request** for my work, which is currently undergoing review, showcasing my commitment to enhancing cybersecurity tools and contributing to the open-source community.

Projects

DocHub | JavaScript, HTLM5 , CSS, BootStrap

October 2023

- Blockchain-based Certificate Generation: Developed a web application called "Dochub" that leverages blockchain technology to create and verify certificates. Implemented blockchain integration to ensure the authenticity and immutability of certificates generated through the platform..
- User-Interactive UI Development: Played a pivotal role in designing and implementing a user-friendly and interactive UI using HTML, CSS, Bootstrap, and jQuery. Prioritized user experience by creating an intuitive interface for certificate generation and verification.
- Government Authority Certification: Integrated a secure certification process that ensures certificates are generated only by authorized government authorities. Implemented a verification system to prevent any unauthorized alterations to certificates, enhancing the integrity and trustworthiness of the platform.

Ecommerce | MongoDB, Express.js, React, Node.js

June 2023

- Full-Stack Development: Successfully developed a feature-rich e-commerce website utilizing the MERN (MongoDB, Express.js, React, Node.js) stack. This encompassed end-to-end responsibilities, from designing and implementing the front-end user interface using React to creating a robust back-end using Node.js and Express.js. Leveraged MongoDB for efficient data storage and retrieval, ensuring scalability and performance. This hands-on experience demonstrates proficiency in both front-end and back-end technologies, making me a well-rounded developer.
- Admin Dashboard Implementation: Designed and integrated a comprehensive Admin Dashboard within the Ecommerce platform. This dashboard provided administrators with real-time insights into sales, inventory management, order processing, and user management. Utilized responsive web design principles to ensure seamless functionality across various devices, ensuring that administrators could efficiently manage the platform from anywhere. This experience showcases my ability to create user-friendly and data-driven admin interfaces, enhancing the overall usability of web applications.
